

Dejavoo QD2

Mobile Wireless Terminal

Large 5.5" Touch Display:

Offers an even bigger touchscreen for enhanced visibility and ease of use - great for showcasing item details or obtaining digital signatures on a bright 5.5-inch screen

Tri-Connectivity:

Like the QD1, it supports 4G LTE, Wi-Fi, and Bluetooth, giving you freedom to take payments anywhere. It also features eSIM technology for global cellular coverage, useful for travel or international usage

Extended Battery Life:

Packs dual 2600mAh batteries (7.4V) for extra-long battery life. You can trust the QD2 to last through peak hours or lengthy outdoor events without needing a charge.

Charging Cradle:

Comes with a dedicated charging base - this acts as a dock to recharge the device and can provide a convenient countertop setup when the QD2 is not in hand.

All-in-One Functionality:

Runs DejaPayPro and other Android-based POS apps, meaning it can handle payments, receipts (via on-screen or external printer), and even act as a mini cash register with inventory management features.

Omni-Payment Acceptance:

Accepts chip cards, PIN debit, contactless taps, and magstripe. The device is PCI 5.x certified for security, with encryption and tokenization through the Dejavoo gateway for safe transactions.
