

Dejavoo QD4

Desktop Android Terminal

Large Touchscreen Interface:

A countertop Android POS terminal with a large, easy-to-use touch screen (approximately 5.5" color display), providing an intuitive tablet-like experience for merchants when ringing up sales.

Integrated Fast Printer:

Built-in thermal printer supports extra-large paper rolls up to 50', minimizing paper changes. It prints receipts quickly (around 50 mm/s), keeping your checkout line moving efficiently.

Reliable Connectivity:

Offers Ethernet and Wi-Fi connectivity (USB for additional peripherals). This ensures stable communications for payment processing; no phone line needed (dial-up not required for QD4).

Robust Performance:

Powered by a quad-core 1.1GHz processor and secure Android OS, the QD4 can handle intense daily transaction loads with stability. It's well-suited for busy retail or restaurant counters that need dependable service.

All-in-One Station:

Typically comes bundled with a power cradle and can be paired with POS management software. It's an ideal choice for businesses that want a standalone register replacement with integrated printing and processing.

Full Card Acceptance:

Accepts EMV chip cards, magstripe, and contactless payments out of the box. Customers can tap, insert, or swipe with confidence – QD4 is EMV Level 1 & 2 certified and NFC-enabled for mobile wallets
